

# Ukrainian Translation

Only once (initially):

Scan me to connect to the Church WLAN

QR-Code 1

or connect manually to the follow WLAN

WLAN Name: **translation**

WLAN Password: **translation**

Every Sunday:

**Connect to the Ukrainian Translation System**

Scan ME to connect to Jitsi

QR-Code 2

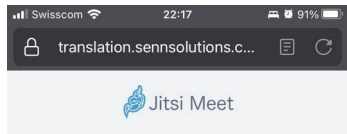

**Follow the instruction on the next page**

If you cannot scan the above QRCode open a browser (Chrome or Firefox) and type the follow address:

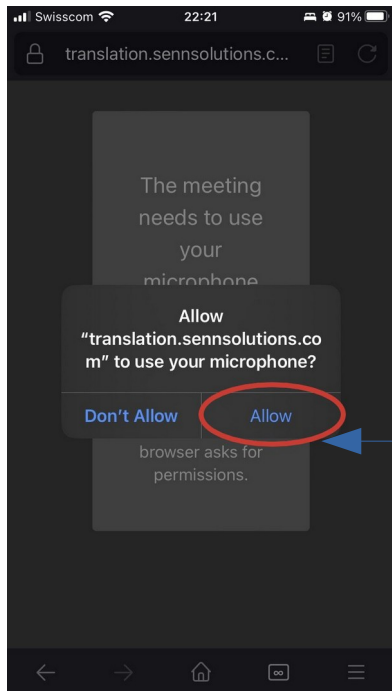

<https://translation.sennsolutions.com/ukr>

**Safari on iPhone not always work properly. Please use Chrome or Firefox.**

## Preferred option 1 (Launch in Browser). You do not need to install anything.

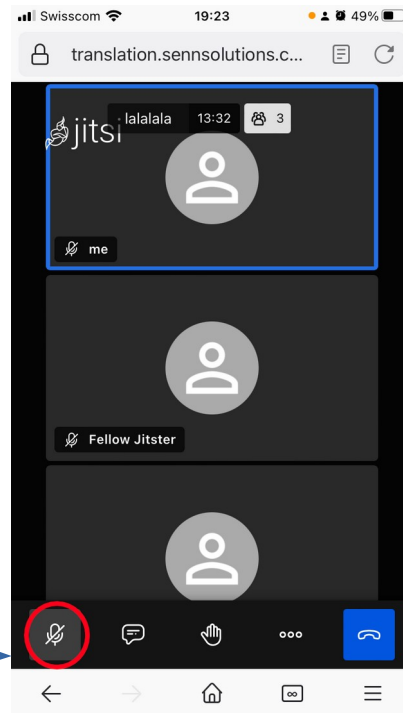

Select **Launch in Web**

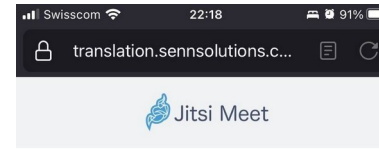

Press **Allow**

**Mute yourself, if not already muted**

## Option 2 - With the Jitsi App

Click on OK:

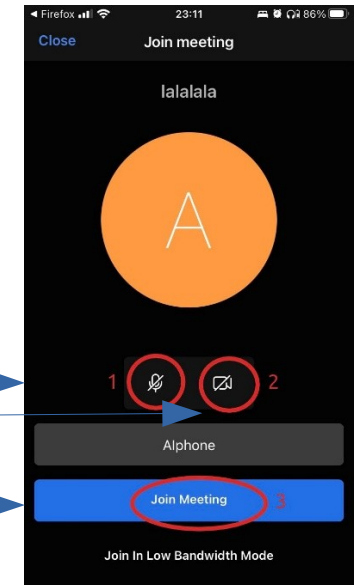

Select **Join this meeting using the app**

**Switch off the Microphone**  
**Switch off the Camera**

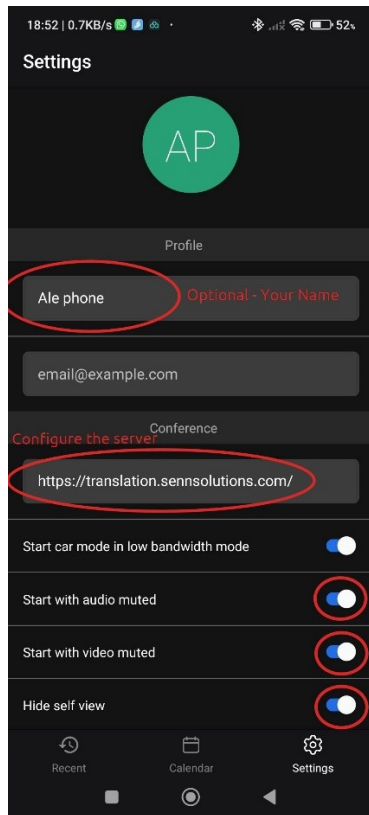

**Join the meeting**

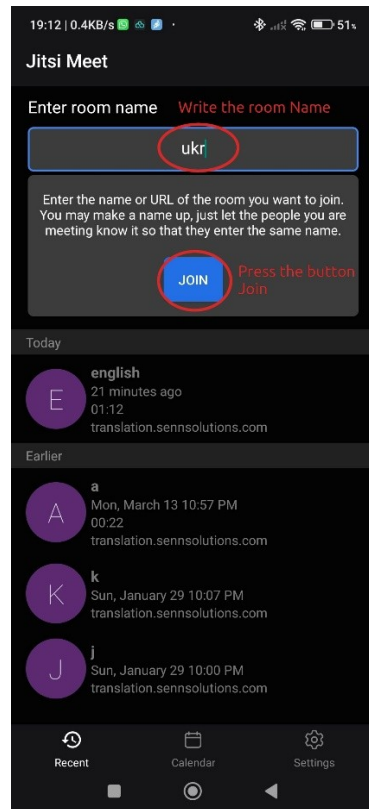

### Option 3 - Manually from the Jitsi App

Open the **Jitsi App**.

(In the Jitsi App go to **Settings** and configure the options below - only once):

Write the Room Name "ukr" and press the button JOIN

If you still cannot connect be sure to switch-off your Internet(Data) Connectivity. The translation works without any data plan. You need only the **WIFI** connection.

If also without Data Connection you cannot connect, check the private DNS setting on your Android phone and disable it and retry to connect with the QR-Code 2.

Search in the phone setting for "private", select "Private DNS" and set it to Off.
